

ABOUT:

Phoenix is the official tech-club of Netaji Subhash Engineering College. It was established in 2006 under the able leadership of a few seniors of the college (seven to be precise). Starting from just seven, in seven years, Phoenix has grown to be the tech - hub of NSEC with a membership of over 200 students from various streams, and a full hierarchy of management.

Students indulged in 'Phoenix-ing' tend to develop various skills which boost their personality and shape up their professional career. They develop a sense of camaraderie, team spirit while working together in organising various events.

Together with Brainstormer, Phoenix also conducts Avenir, the inter-college tech fest of NSEC.

Thanking You,

Phoenix
